In the Main Gallery

In the Photography Gallery

PHYLLIS BOHRER: *The World in Color*, through October 31. Little Neck resident Phyllis Bohrer writes: "I started in photography because of my love for animals. I bought my first camera because I was going on an African safari. Most of my photography is from foreign travels and photo workshops. I feel photography is more than a source of factual and visual forms of expression. It is a dramatic and captivating creative art. And I try to live up to that belief with my images. As much as I am involved with my photography, I am still in private practice as a psychotherapist. My art exhibit is called "The World in Color." I picked this theme as I am very much into dramatic, colorful shots that capture the essence of a place and the people who live there."
